

End of Life Announcement For 5CD Models

Effective May 1, 2026, ADS will cease manufacturing the 5CD L-R and R-L models. These models will be replaced by the model DASL, which offers inline, corner, left, and right capabilities in a single unit.

Specific parts for the 5CD models, including hoods, pans, doors, door arms and stands, will be available for 18 months or until the present inventory is depleted. However, service items such as motors, pumps, gaskets, seals, electrical components, and plumbing that are common to current models will remain available.
